Environmental Protection, **Exeget Consulting Oradea*

Abstract. The elements which affecting the mechanical washing of the bottles, are: the bottles, the labels, the corks, the water, the foam forming. These washing solutions must have the qualities that help the process to be efficient to a great extent. In spite of all this, the causticity is only one thing which can have a real effect on the bacteria, yeast and mould destruction, which can be present in bottle which is reimbursed.

Keywords: causticity, germs, dispersion, stability.
