

RESEARCHES ABOUT INFLUENCE OF SOME AGENTS ON PIGMENTS CONTENT IN MEAT

IULIANA MANCA PREDĂ

Universitatea Valahia Targoviste

Abstract. This work hints to study the influence of some agents on pigments content in meat: myoglobin, oxymyoglobin, and metmyoglobin. Along this paper I hinted to prove the importance of some agents such as: the species, the age and the type of muscle, on the colour of the meat.

Keywords: myoglobin, oxymyoglobin, metmyoglobin, meat
